PROFILE STATEMENT

Computer Science graduate with a strong sense of ownership and a proven ability to learn and adapt quickly. Skilled in deriving optimal solutions through research, experimentation, and analytical thinking. Known for professionalism, clear communication, and independent project execution. Passionate about advancing software quality through rigorous testing and intelligent automation, applying AI-assisted methods to enhance accuracy, coverage, and overall development efficiency.

EXPERIENCE

SJ Innovation LLC

Nov '25 – Present

Software Quality Assurance Engineer (Trainee)

Dhaka, Bangladesh

- Develop and execute manual and automated test cases for web and API-based applications.
- Collaborate with developers to identify, document, and resolve software defects.
- Contribute to test documentation, reporting, and continuous improvement of QA workflows.

Mongol Tori

Oct '22 – Dec '24

Research & Documentation, AI & Autonomous Subteam

Dhaka, Bangladesh

- Contributed to test planning and validation of AI models and autonomous navigation logic, identifying performance issues and documenting test outcomes.
- Collected and analyzed performance data from rover sensors to improve autonomous navigation.
- Implemented data-driven decision logic using Python and ROS for object detection.
- Maintained versioned datasets and documented insights for the research team.

BRACU Express

June'21 – Nov'23

Sports Journalist & Editor

Dhaka, Bangladesh

- Conducted interviews and gathered qualitative data for publication, enhancing reporting accuracy.
- Analyzed readership trends using Excel to track article engagement metrics.
- Collaborated with a diverse editorial team, developing strong communication and presentation skills for client-facing tasks.

TECHNICAL SKILLS

- **Programming:** Python (Flask, Django), JavaScript
- **QA Practices:** Test Case Design, Regression Testing, Bug Tracking
- **Testing Tools:** Selenium, Postman, Cypress, Playwright, JMeter
- **Data Analysis & Visualization:** Power BI, Excel (Pivot Tables, Macros), Google Sheets, Matplotlib
- **Web Development:** HTML, CSS, Node JS, Django, Flask
- **Database Management:** SQL (MySQL, SQLite, MongoDB), Query Optimization, Data Cleaning
- **Version Control:** Git, GitHub
- **Other Expertise:** L^AT_EX, Arduino

EDUCATION

BRAC University

Jun '21 – Oct'25

Bachelor of Science in Computer Science

CGPA 3.51

Mirpur Cantonment Public School & College

Jul '18 – Dec '20

Higher Secondary Certificate

GPA 5.00

ACHIEVEMENTS

- **1st Runner Up – NASA Space Apps Challenge 2022 (Dhaka Region):** Built a web-based space data visualization platform to display stellar variability and 3D planetary models using real scientific datasets.
- **Math Olympiad:** Achieved 3rd place in BAGHC, 2017
- **Science Project:** Achieved 3rd place in BAGHC, 2017

PROJECTS

Shopping Ecommerce site | *React, TypeScript, Vite, Tailwind CSS*

- Developed a modern, full-featured ecommerce web application showcasing best practices in frontend development and UI design.
- Implemented product listing, cart, checkout, and wishlist functionalities with responsive, modular components.
- Created administrative dashboards to visualize donor availability and system performance.

Blood Services | *HTML, CSS, Python, Flask, SQLite*

- Rebuilt an existing database system for performance optimization and secure data handling.
- Applied SQL queries for tracking donor activity and generating summary reports.
- Integrated encryption (bcrypt) to maintain data privacy and integrity.

Stock Prediction using Machine Learning | *Python, Scikit-learn*

- Integrated Flask to deploy an interactive web interface for real-time stock prediction visualization.
- Implemented data preprocessing, feature extraction, and model training pipelines with Scikit-learn.

Recipe Blog Site | *Node.js, Express, EJS, MongoDB, JavaScript, CSS*

- Implemented RESTful APIs for recipe CRUD operations and category-based filtering.
- Integrated MongoDB for storing recipes, ingredients, instructions, and user ratings.
